RESEARCH PROFILE

Research in data-efficient and trustworthy deep learning, spanning self-supervised representation learning, weakly supervised medical image analysis, vision-based agriculture and reliable intelligent networked systems. My doctoral interests include label efficiency, uncertainty, interpretable prediction, and robust generalization.

EDUCATION

MS Computer Science | Institute of Management Sciences, Peshawar
2018-2020
CGPA 3.90/4.00; Gold Medal and first position (cohort of 60). Research project on explainable deep learning for diabetic retinopathy detection using fundus images.

BS Computer Science | University of Peshawar
2011-2016
CGPA 3.60/4.00; third position (cohort of 120). Final-year project on a database-driven parent communication system.

PUBLISHED AND ACCEPTED RESEARCH

PlantCLR: Contrastive Self-Supervised Pretraining for Generalizable Plant Disease Detection
Scientific Reports, Volume 16, Article 10550 (2026). First author. DOI: 10.1038/s41598-026-45684-x

PPTM-IoV: A Privacy-Preserving Trust Management Framework for the Internet of Vehicles
Scientific Reports (2026). Accepted for publication; online publication details pending.

Secure and Privacy-Preserving Intrusion Detection in Wireless Sensor Networks
ACM Symposium on Applied Computing, 2026, pages 2081-2087. DOI: 10.1145/3748522.3779960

Beyond Labels: Contrastive Representation Learning for Scalable Plant Disease Diagnosis
IEEE SmartAgri & SuSY (2025). First author. DOI: 10.1109/SmartAgriSuSY68475.2025.11466957

RESEARCH MANUSCRIPTS

Work under review / revision or submitted includes XDR-Net (diabetic retinopathy), a convolutional-transformer framework for retinal screening, and CASR-Net (confidence-aware weakly supervised chest CT lesion segmentation). Current status is detailed on the research portfolio.

SELECTED PROJECTS AND METHODS

PlantCLR | Self-supervised representation learning
Contrastive pretraining and cross-dataset evaluation for generalizable plant disease classification.

CASR-Net | Weakly supervised segmentation
Teacher-student learning, confident pseudo-label refinement, sparse scribbles and medical CT lesion evaluation.

EviCT | Evidence-grounded medical imaging research
Ongoing study of uncertainty-aware segmentation and image-grounded reasoning for interactive CT analysis.

AI for Network Security | Trustworthy connected systems
Experimental contributions to privacy-aware intrusion detection; research interests extend to robustness and reliability of AI-enabled networks.

ACADEMIC AND PROFESSIONAL EXPERIENCE

Lecturer in Computer Science | Government College of Management Sciences, Peshawar

November 2018 - Present

Undergraduate teaching, research project guidance, curriculum design, staff training and institutional digital systems.

Curriculum Developer and Master Trainer

Programming and database curricula, faculty development, and online educational information-system deployment.

TECHNICAL STRENGTHS

Deep learning; computer vision; PyTorch; Python; CNNs; vision transformers; self-supervised and contrastive learning; weakly supervised learning; explainable AI; CT and fundus imaging; model evaluation and ablation studies; C++; C#; PostgreSQL.

HONORS AND LANGUAGE

MS Gold Medal and first position (2020); third position in BS Computer Science (2016). IELTS Academic overall band score: 7.0 (2025).
